Two Engines Crash Into Rack Other---No One Seriously Injured

Two freight engines pulling light trains crashed into each other about eight miles west of Coleman on Wednesday evening. Each were running at fifteen miles an hour and when they struck they were both stood on ead. Neither engineer saw the other approaching train until they were within a hundred yards. Then they haatily set the brake and reversed the wheels and jumped. Both engineers and firemen reached the ground in safety.

The only person to receive any injuries and later it has been found that they are slight, was a brakeman on the west bound freight. He was caught between two cars but managed to get away before the second lunge.

It took almost twelve hours to cle

and Lethbridge form a Hockey League

A large and enthusiastic hockey meeting took place at the office of the Crow's Nest Pass Coal Co., at eight o'clock on December 10. Representatives were present from Echeman, Moyle, Lethbridge, as well as Fernle. The question of forming a league of the larger towns of the Pass was taken up and fully discussed. It was smuch regretted that smaller towns like Pincher Creek, Blairmore and Michel did not send representatives. D. J. McIntyro represented Coleman and report that a strong league has been formed. Below is a summary of the proceedings of the meeting.

She whirled around on him. "Just as it is a man's tejks to bee his heart!" she blazed.

He grew white. "I didn't thiok you'd say' a thing like that." he said and turned and left ber.

She went running after him. "Oh. Dlek, Dick." she cried, "I didn't mean ft." He tramped on, unherding, and at last she same up to him and laid. He stopped and looked down at her gravely. "I'll admit it wasn't very nice of me to make that remark shout the ball," he said, "but there's a difference between making fun of a girl's game and making fun of a man's love." "Yes, there is," she admitted. "And I'm sorry. Dick."

Of course he forgave her, as he had forgiven her all summer, ever since that first hight when he had heen pre-cented, to-her in the hallroom of the bis soid and, she had divided his walls with some one else. THE BOARD OF TRADE

The Board of Trade is one of the principal factors which has much to do with the material progress of any growing town. The Board of Trade represents the business and commercial life of a town. The success that it attains, the widened path of progress that it biases and improves, is reflected by ameliorated conditions on every class of trade and citizen. The work of the Board of Trade is often obscured and to this may be traced the general lack of interest in such lumportant bodies. The Board of Trade is one of the incipal factors which has much to

obscured and to this may be truccut the general lack of interest in euch important bodies. The Board of Trade in Coleman has already been a great factor in seeking and accomplishing many things that have stood to our benefit and have stood to our commercial advantage. If the Board has been enabled in the past to do so much for us what could it not accomplish if its hands were strengthened and its support more enthusiastic. Every business man should be a member of that Board, especially the merchants. Still there are so many questions that do not come under the caption of business and commercial comption in the same process.

questions that do not come under the caption of business and commercial activity that many more of our citi-zens night be admitted to member-ship. The "Miner" would like to see every citizen take an interest in our Board of Trade.

EDITORIAL NOTES

It's fine weather for incorporation It's a red-hot Xmas they're 'aving in the awl country.

The snow loses a lot of its texture when placed on a warm stove.

While we are thus waiting, the cen-

Hon, Duncan Marshall is in Ontario studying farming, which is a most congenial occupation in winter.

It's really too bad one of our pretty Coleman young ladies did not strive for the Lethbridge Herald prize.

If you would like to exchange your quiet life for a bit o' the real, take a jaunt over to John Bull's country. They hit in clinches over there.

The war for incorporation and the war of 1812 both statted over a pig. One pig was in a back yard in Massa-chusetts and the other in a hog pen in

We hear the Blairmore business men have determined to expend \$3,000 on improving the road to the South Fork. This enterprise would be of more material benefit than six local industries.

local industries.

John Stocks has at last come out flat-footed on the road question. In an interview he told a responsible person that the road from the prairie to the B.C. boundary line would be completed by June, 1910.

Dr. Tory, President of the Alberta University, will shortly four the province. He is going to introduce on the curriculum of the university an advanced course on hog raising, and he points with pride at the progress he has made himself.

REPAIRING ROAD IN PASS

REPAIRING ROAD IN PASS
It is now reported that the government has decided to make sufficient repairs to the road through the Pass to put it in passable condition for the winter. In response to an appeal from the Blairmore village council, Mr. Cadder, of the department of public works wisted the district the hast of last week and authorized repairs to the bridge over the Old Mau west of Blairmore and some other work necessary to put the road in a safer condition for the winter.

PASSBURG HAS A FUTURE

The prospects that Passburg will in the near future justify having a position on the map and an important one at that, are very bright. The Leitch Collieries, founders of the town, is carrying on extensive development work and on this opment work and on the strength of a very much augmented pay roll a growth of the town that promises to be very substantial, is setting in.

The company has nearly com-

pleted its spur line to the new mine being opened at Police Flats. The road will be ready for operation by the first of the year and shipments from the new mine will begin then. It is expected to start out with a hundred tons a day and as de-velopment of the seam is well-advanced, the output is expectpleted its spur line to the new advanced, the output is expectadvanced, the output is expected to grow rapidly. The company's original mine is now in
good condition to turn out a
good sized toanage and but for
the shortage of cars would be
an important factor in the market. With the passing of the
car stringency and the resumption of operations at full capacity the company will take a ity the company will take a position among the extensive shippers.

With the improved prospects, the town is building more rapid-ly than at any time in the past. Mainly the buildings going up are residences and the number is considerable; but in a short time, one of the first adjuncts of a town, a first-class hotel, will be supplied, The projector is T. H. There is now talk of organiz-ing as a village and petitioning for the construction of a school and altogether the outlook for much progress next year is most encouraging.

Why Stanfield's Make Underwear

UP to 20 years ago, most everyone considered that all Underwear—no matter how well cut and made—would shrink and harden.

In those days, the makers were working on the wrong idea. They were trying to find a way to finish Underwear so that it would not shrink, instead of trying to find a way to get the shrink out the wool before the yarn went to the knitting machines.

The late C. E. Stanfield—who knew

wool as only a man can know it who studies it from the sheep's back to the wearer's back—gave his attention to the problem for years.

problem for years.

Living in Nova Scotia, he soon realized that woolen underwear, and the best of pure woolen underwear, was the only kind that would and could protect the Canadian against the rigorous Canadian Winter. He found that as underwear was then made, he could not make woolen underwear that would not shrink, mat and harden. He devoted himself to this problem and after many years of experimenting, he finally discovered a method by which he could take the shrink out of the wool before the garments were knitted.

were knitted.

This method, improved and perfected, has made possible the immense business of Stanfield's Limited, with a larger output of their special classes of Underwear than any other factory in Canada.

The Stanfields make underwear today because Canadian people find Stanfield's Underwear the most comfortable, the most durable, and the warmest for its weight, The Stanfields are making more underwear every year because the buying public demands more of ir. Popularity is a good test of quality.

In 3 randard weights—Light (Red Label), Medium (Blue Label) and Heavy (Black Label) and 17 other weights and qualifies to suit the needs and requirements of every man and woman.
